FALCUTÉ DES SCIENCES ET TECHNOLOGIES

(FST)

TROISIÈME ANNÉE L3

Rapport de Laboratoire 1

Cours : Systèmes

Nom et Prénom : St Juste Rood Shaïna

Professeur : Ismaël SAINT AMOUR

21 OCTOBRE 2026

L’objectif de ce TD est de :

L’objectif de ce TD est d’apprendre à utiliser Git et GitHub pour gérer et organiser des projets informatiques.

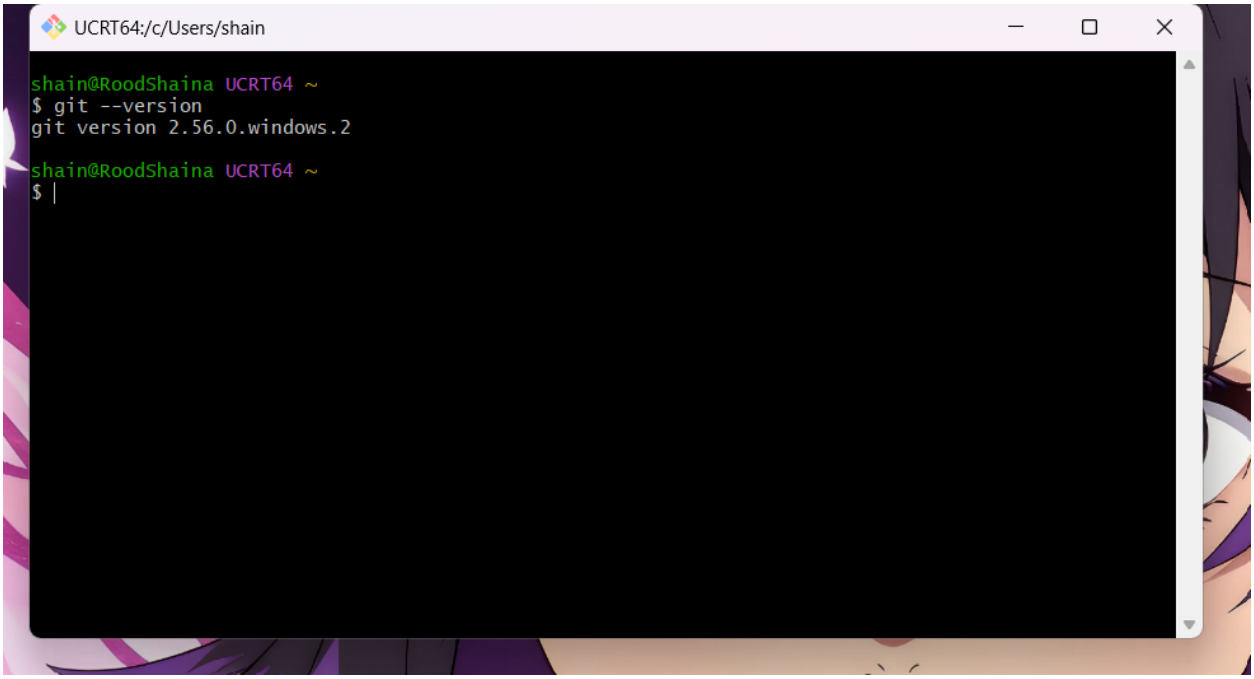

Les principaux objectifs sont :

- Comprendre le fonctionnement de Git et de GitHub.
- Installer, vérifier et configurer Git sur un ordinateur.
- Maîtriser les commandes de base du terminal.
- Créer et gérer un dépôt local.
- Ajouter des fichiers et enregistrer les modifications avec des commits.
- Créer une clé SSH pour sécuriser la connexion à GitHub.
- Créer et cloner un dépôt distant.
- Organiser les fichiers d’un projet en créant des dossiers.
- Apprendre à partager et à gérer efficacement un projet informatique.

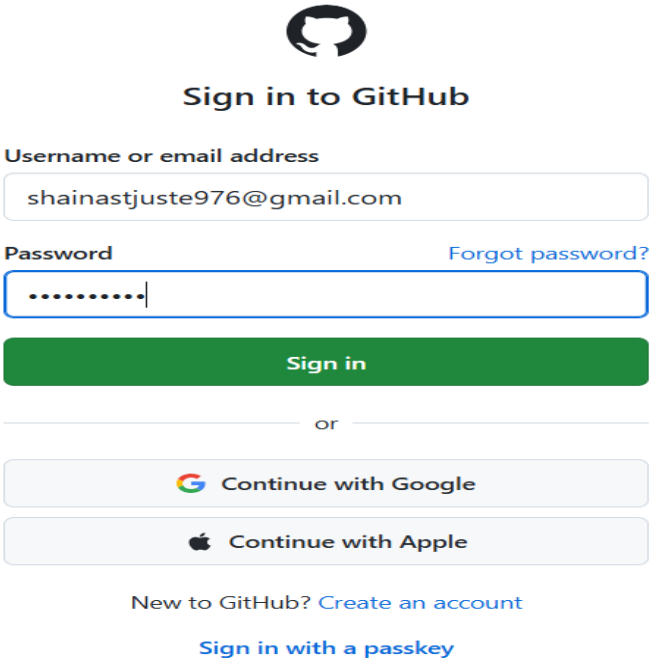

Travaux Dirigé

- Reproduire une série de tâches.
- Créer un nouveau dépôt sur GitHub.

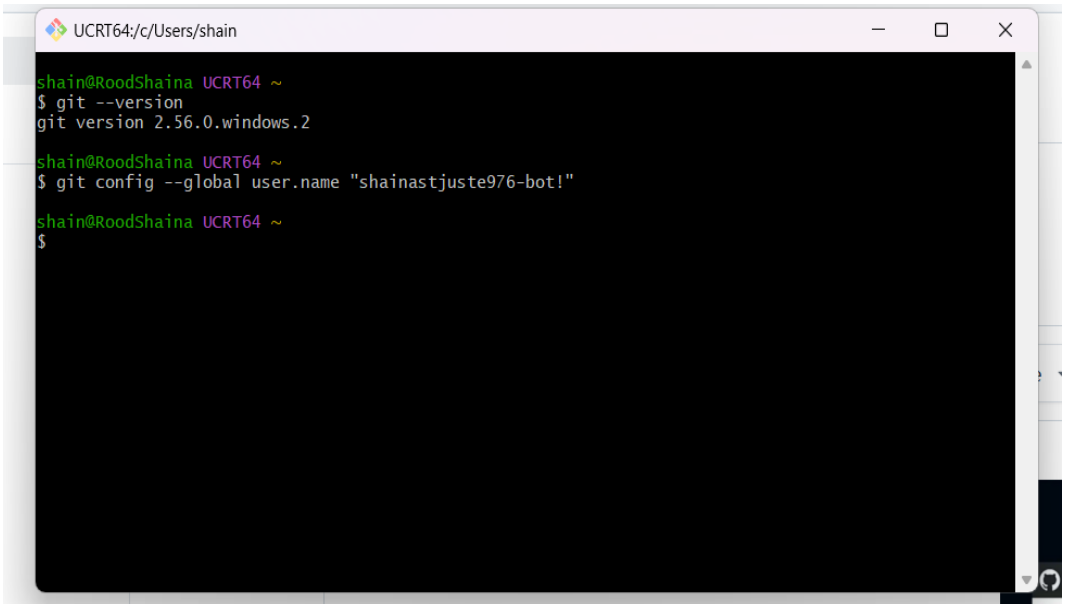

1. Vérification de l'installation sur le PC.

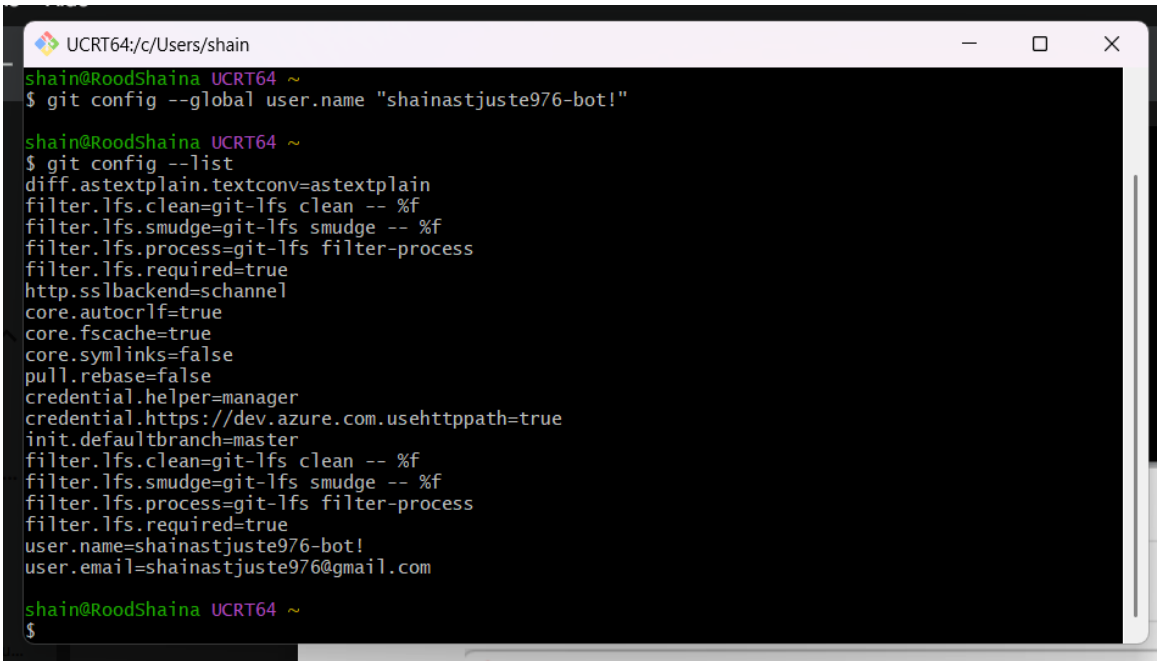

2. Connexion au compte GitHub.

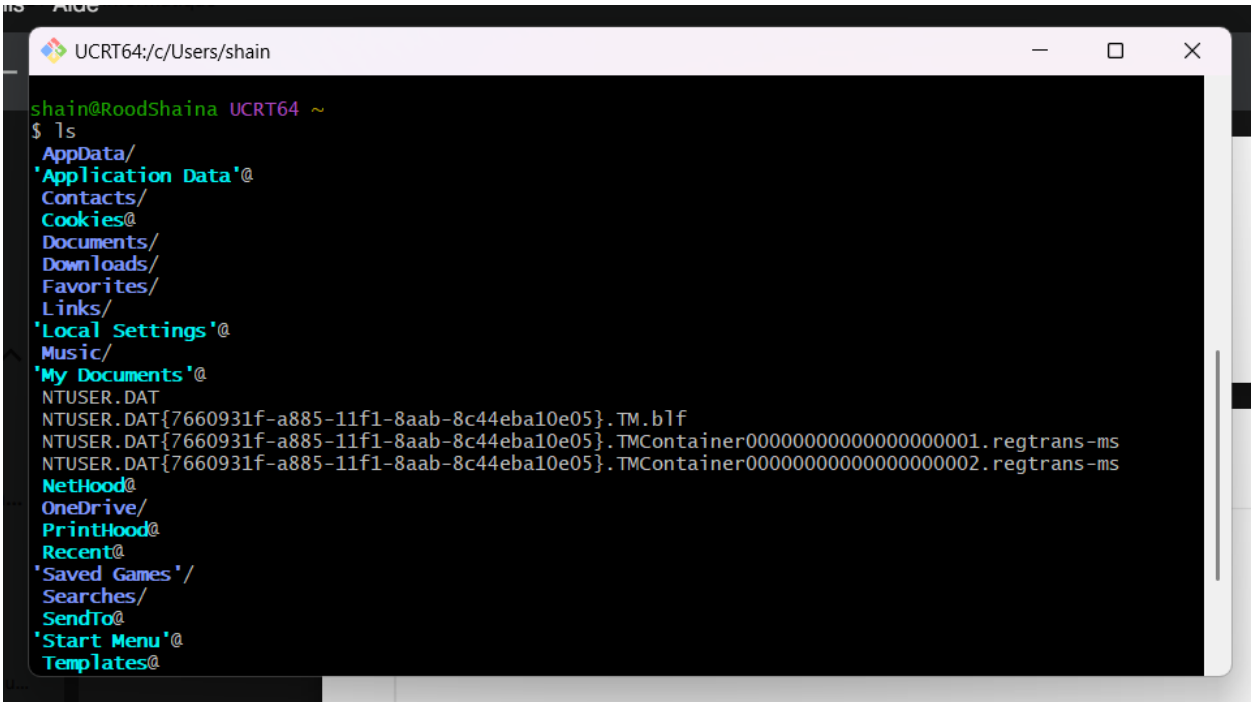

3. Configuration de Git.

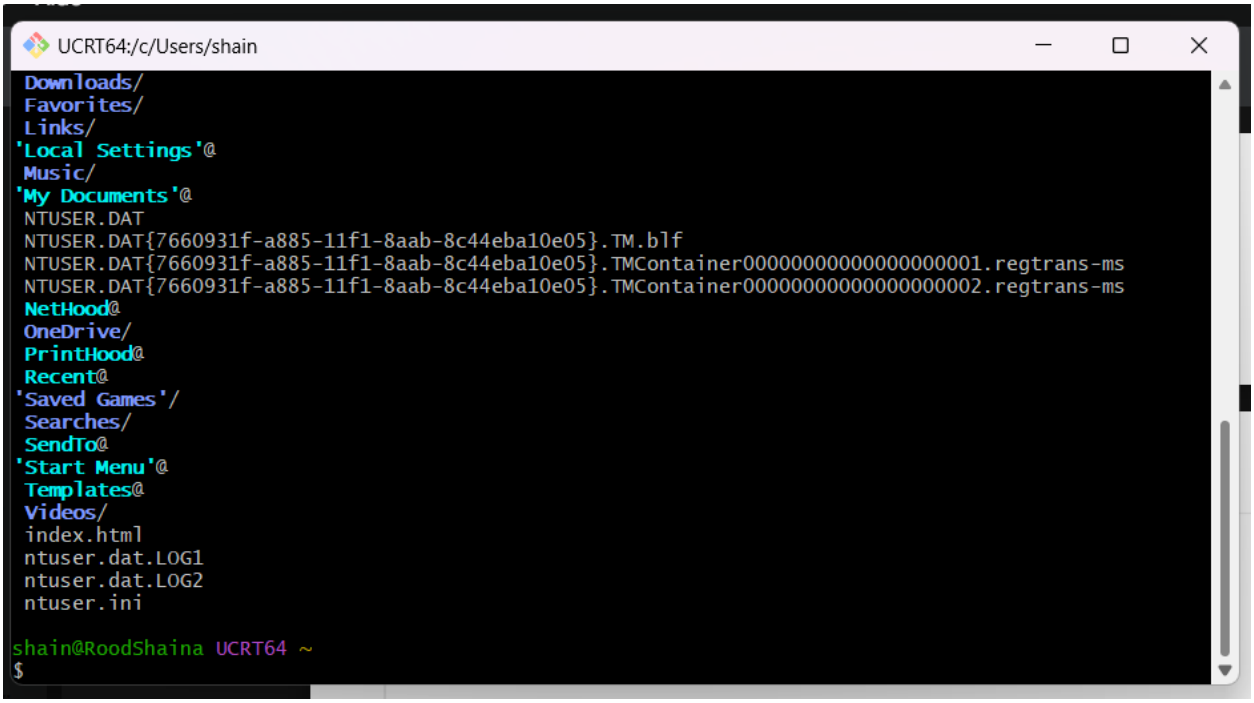

4. Contrôle de la configuration.

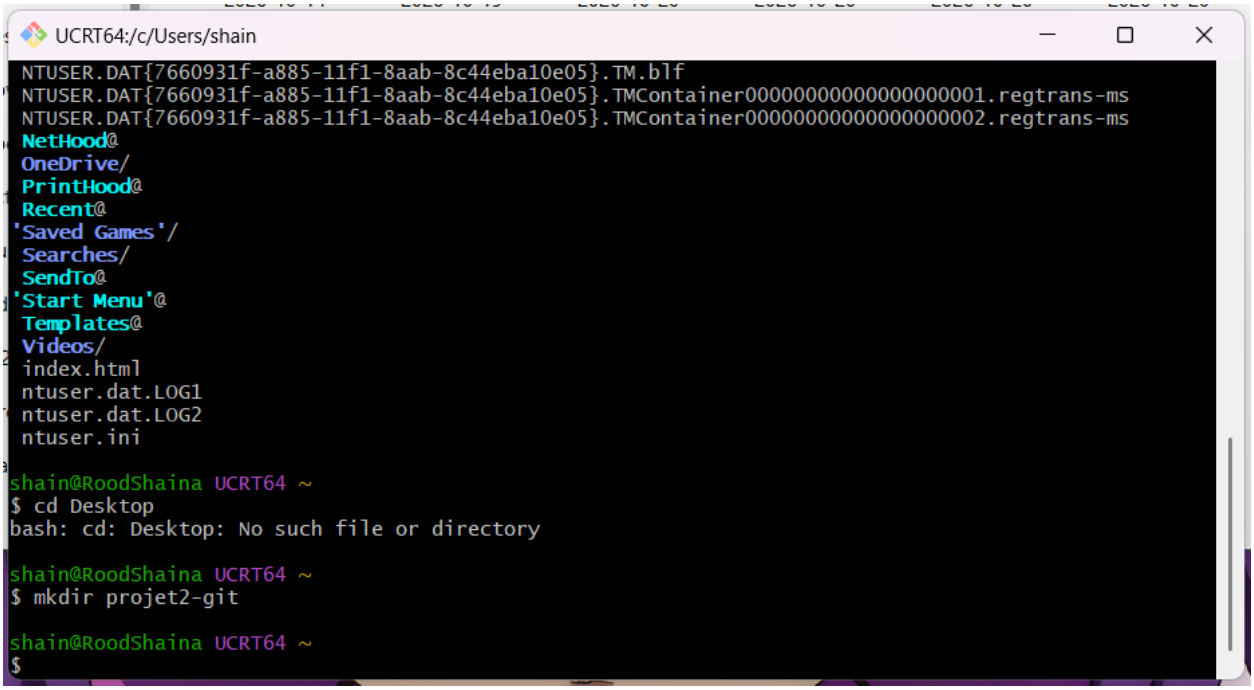

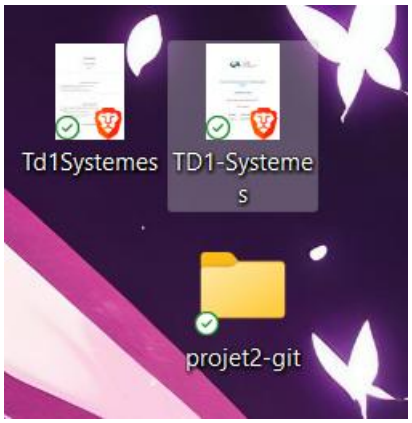

5. Affichage de la liste des fichiers et dossiers avec la commande ls.

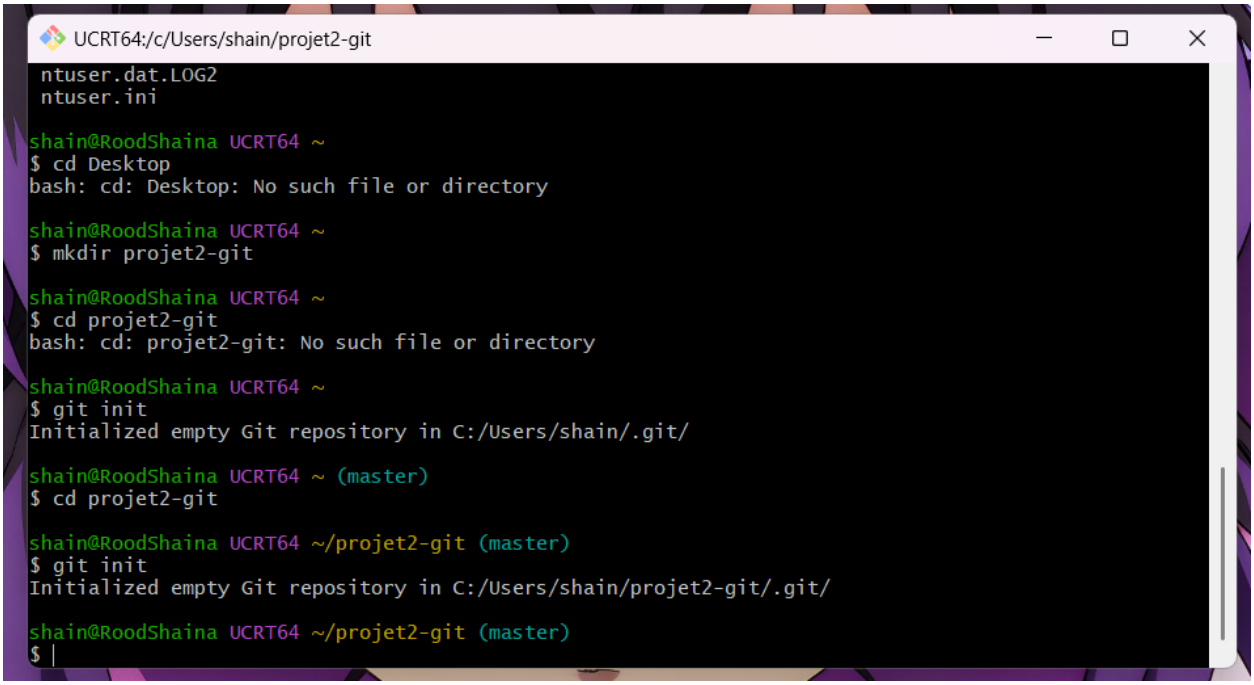

6. **Création du dossier dans Desktop.**

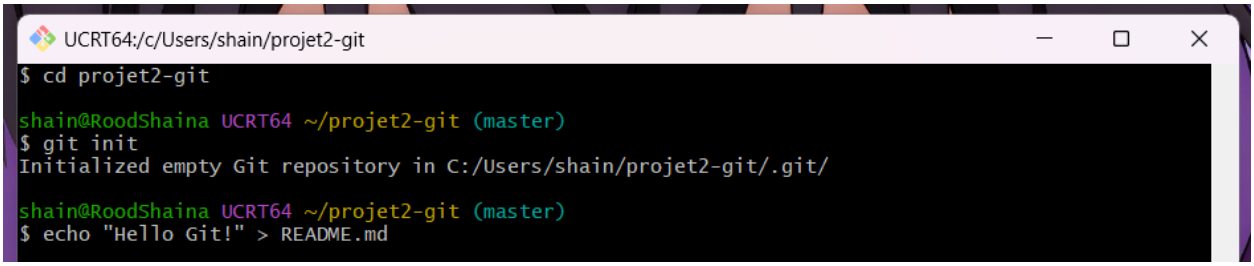

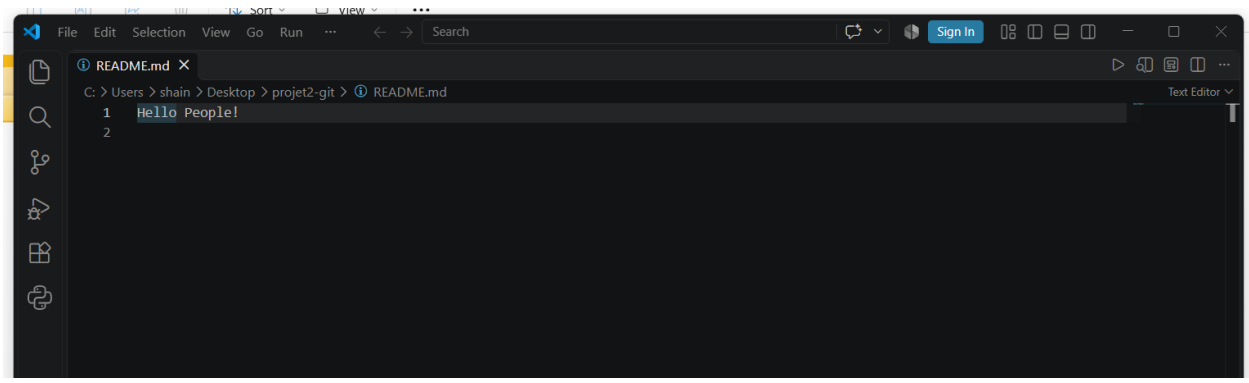

7. **Entrée dans le dossier “projet2-git” que je viens de créer et initialisation du dépôt.**

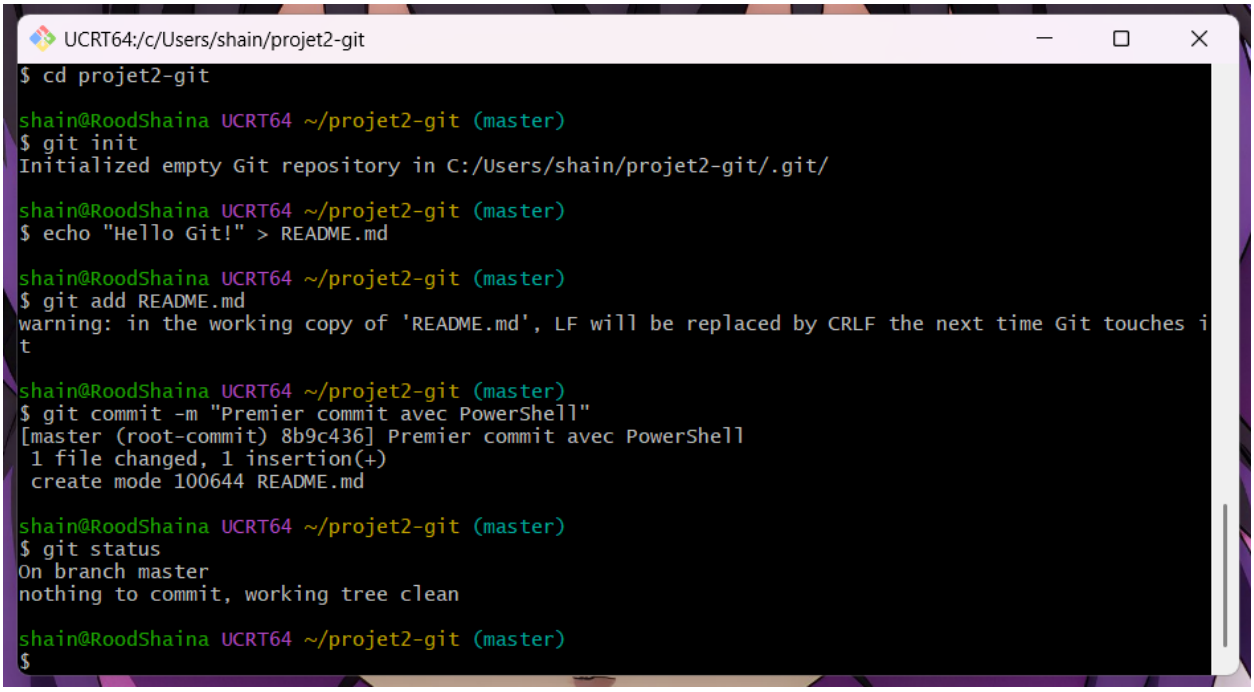

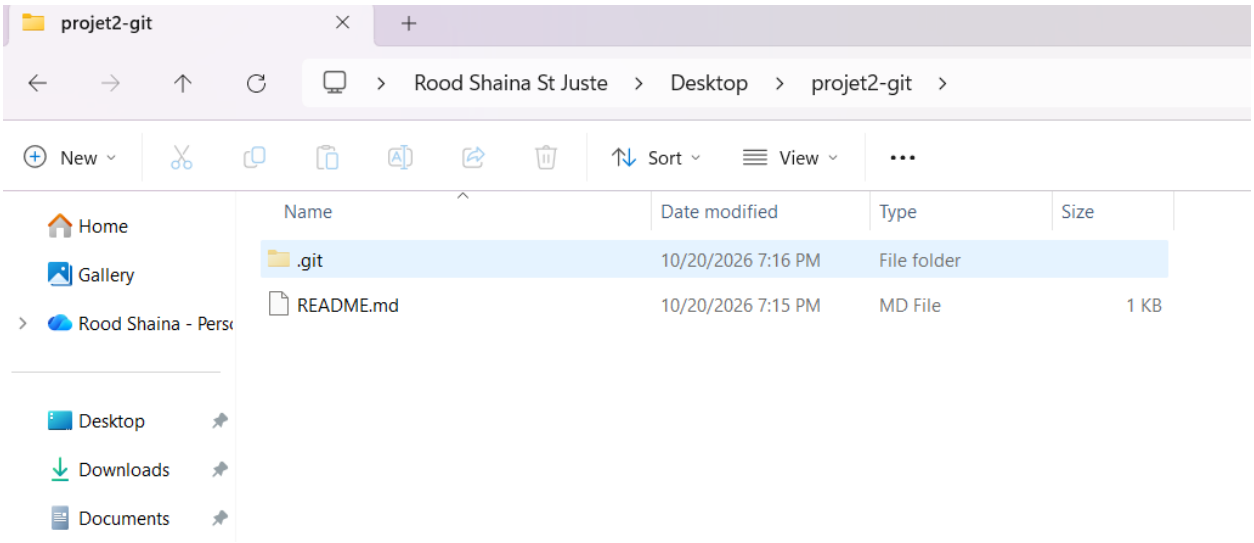

8. Création du fichier README.

9. Ajout des fichiers et premier commit.

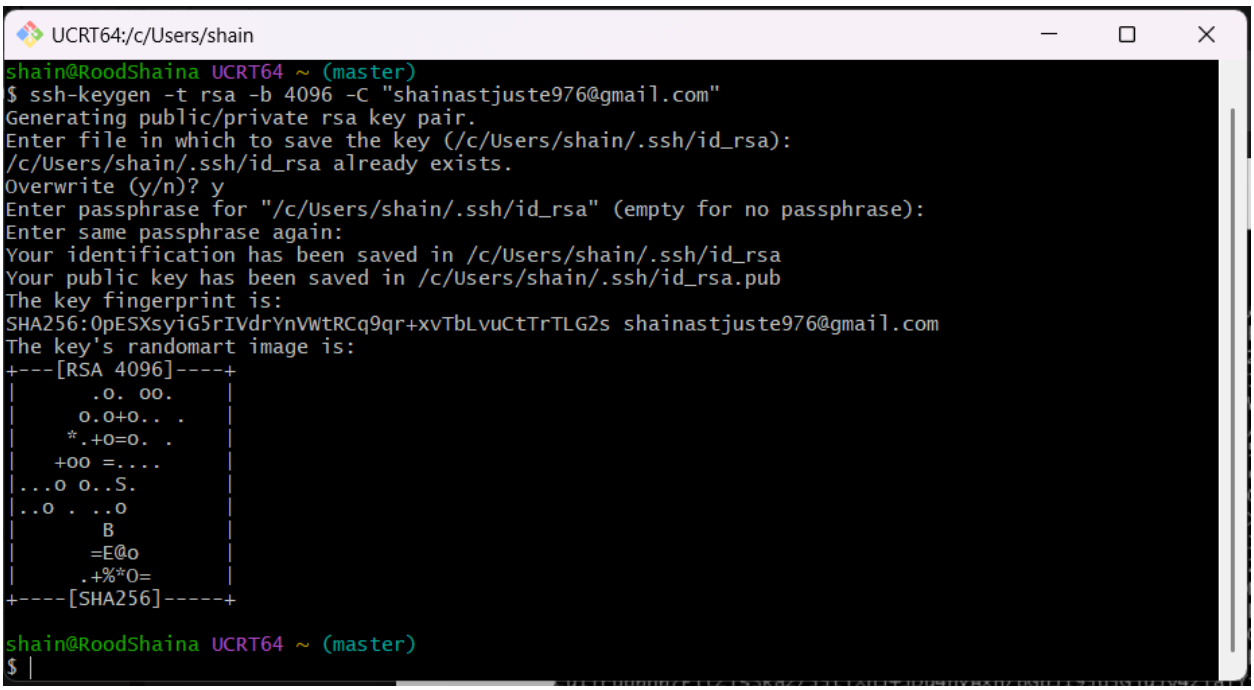

10. Vérification de l'historique des commits du dépôt.

```
shain@RoodShaina UCRT64 ~/Desktop/projet2-git (master)
$ git log
commit 3da2cc9cb876940bb7170ba049fc13e5ca4c3be3 (HEAD -> master)
Author: shainastjuste976-bot! <shainastjuste976@gmail.com>
Date:   Tue Oct 20 19:16:16 2026 -0400

    Premier commit avec PowerShell

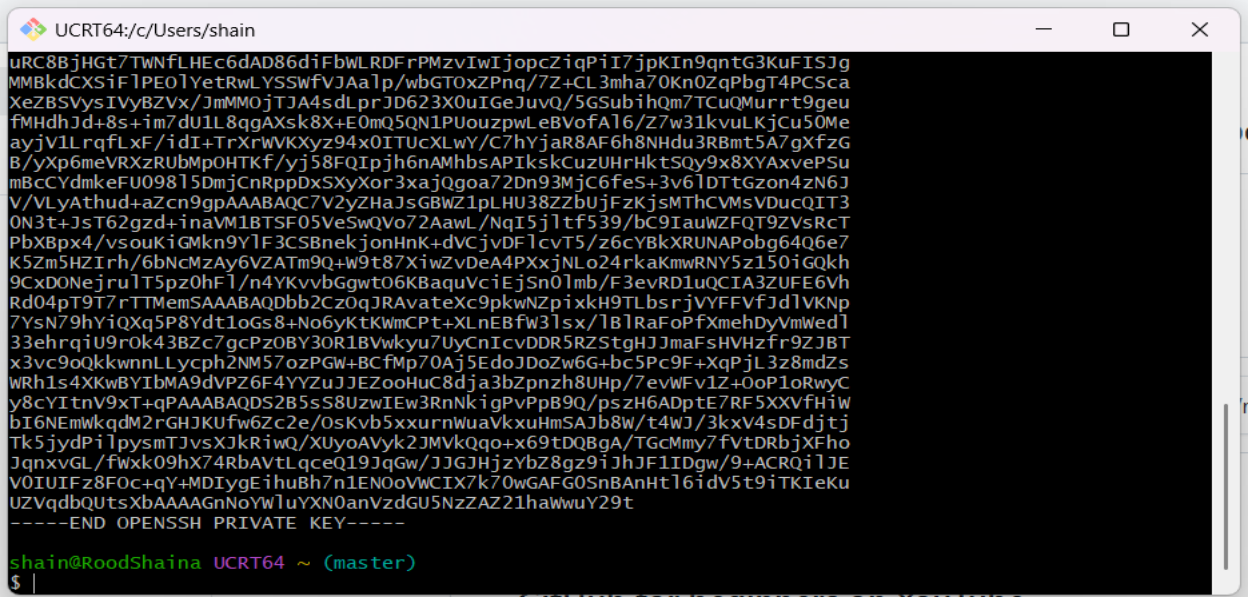

shain@RoodShaina UCRT64 ~/Desktop/projet2-git (master)
$
```

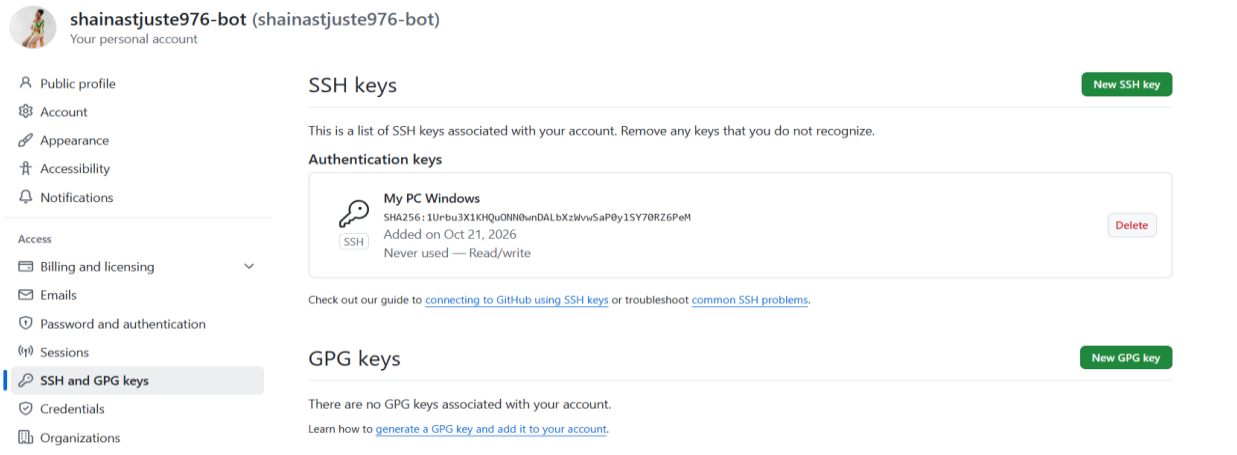

11. Créeation d'une clé SSH.

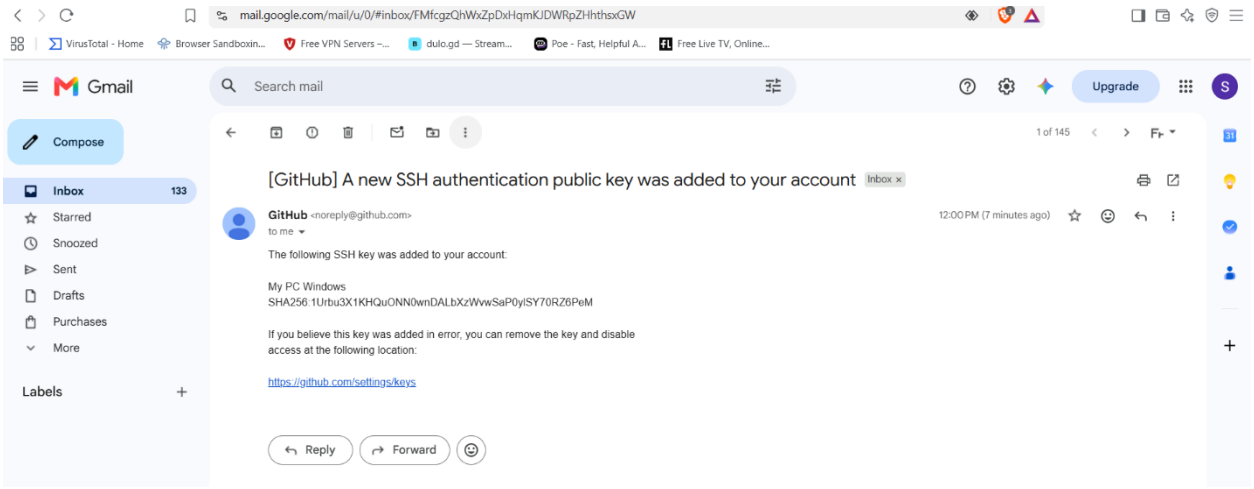

12. Affichage de la clé privée avec la commande cat.

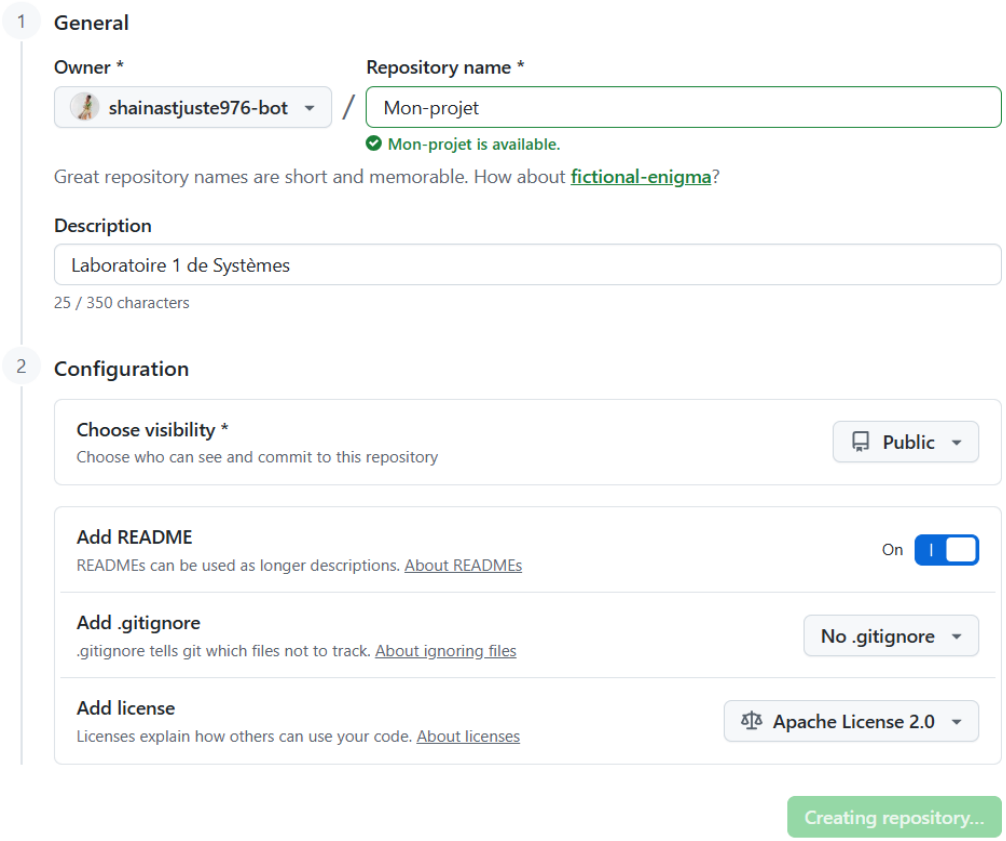

UCRT64:/c/Users/shain
$ cat ~/.ssh/id_rsa
-----BEGIN OPENSSH PRIVATE KEY-----

Deuxième exercice : organisation du dépôt TD

1) **Création du dépôt “TD”**

1 **General**

Owner * shainastjuste976-bot / **Repository name *** TD

TD is available.

Great repository names are short and memorable. How about supreme-octo-guide?

Description

System Lab

10 / 350 characters

2 **Configuration**

Choose visibility *
Choose who can see and commit to this repository — Public

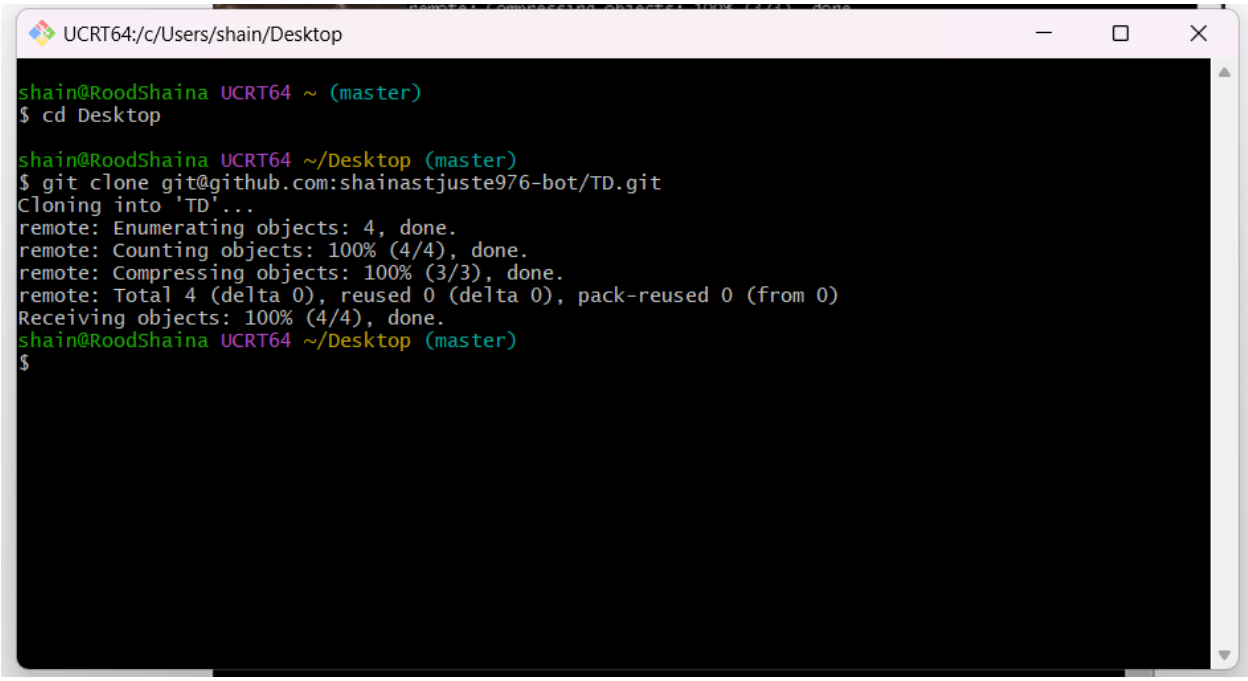

Add README
READMEs can be used as longer descriptions. About READMEs — On

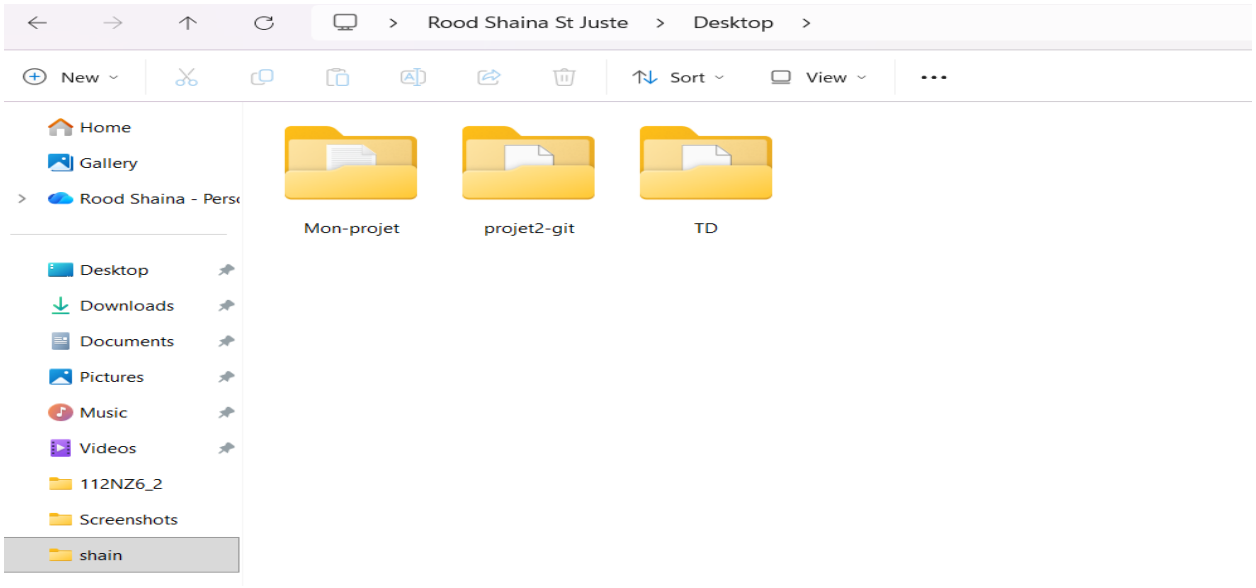

Add .gitignore
.gitignore tells git which files not to track. About ignoring files — No .gitignore

Add license
Licenses explain how others can use your code. About licenses — Apache License 2.0

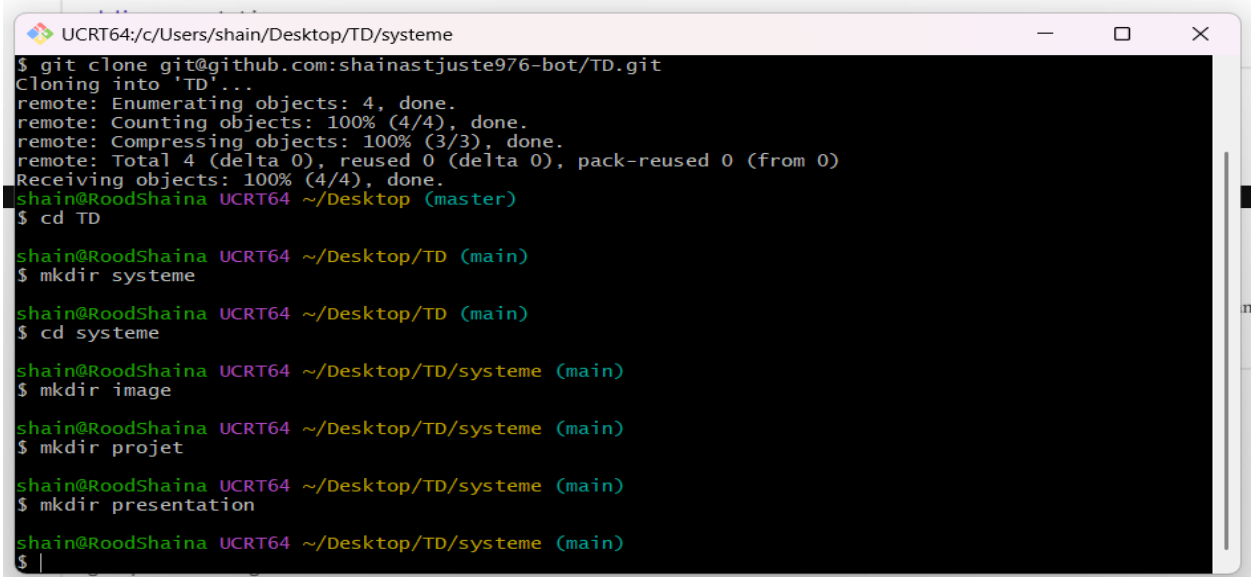

Create repository

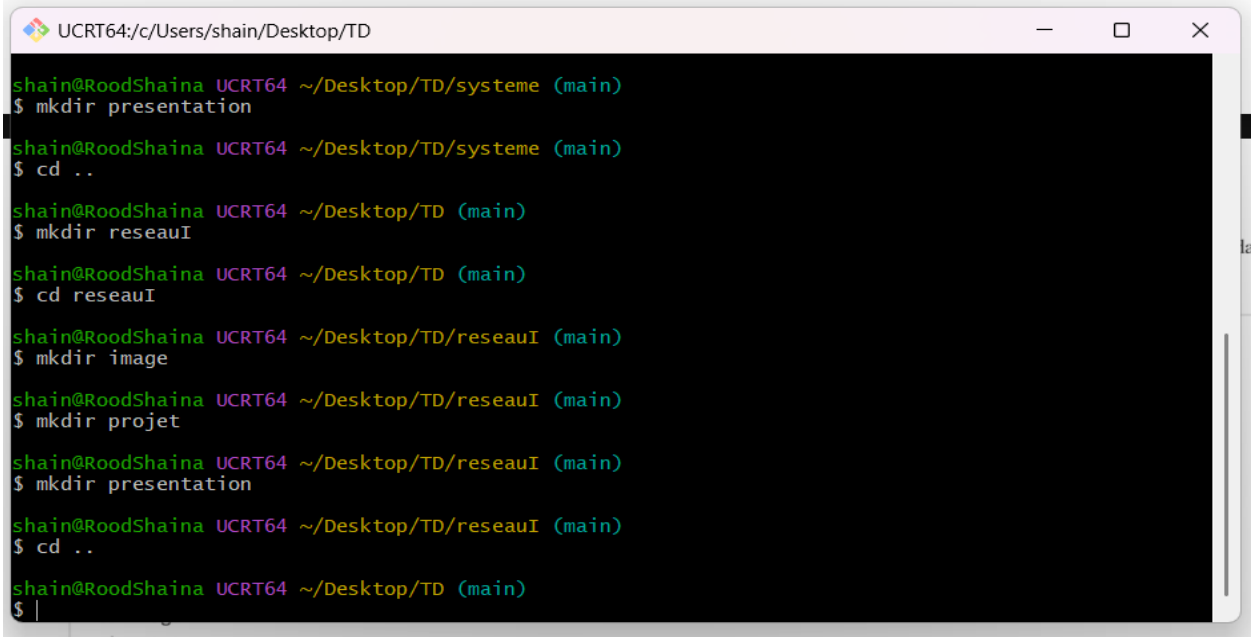

2) Clonage du dossier TD sur Desktop

3) Création des dossiers de TD

Notions acquises durant ce laboratoire :

Commande	**Utilité**
git --version	Afficher la version de Git installée.
git config --global user.name / user.email	Définir l'identité utilisée pour les commits.
git config --list	Consulter les paramètres Git.
ls	Lister les fichiers et répertoires.
cd	Changer de répertoire.
mkdir	Créer un ou plusieurs dossiers.
git init	Initialiser un dépôt local.
git add	Préparer des fichiers pour le prochain commit.
git commit -m	Enregistrer un point de l'historique avec un message.
git status	Afficher l'état du dépôt.
git log	Consulter l'historique des commits.
ssh-keygen	Créer une paire de clés SSH.
git clone	Copier un dépôt distant vers l'ordinateur.
git push	Envoyer les commits locaux vers le dépôt distant.

Conclusion

Au terme de ce travail dirigé réalisé dans le cadre du cours de Systèmes, j'ai pu approfondir mes connaissances sur Git et GitHub et mieux comprendre leur importance dans la gestion des projets informatiques. J'ai appris à configurer Git, à utiliser les commandes de base, à créer un dépôt local, à enregistrer les modifications et à rédiger un fichier README.

Ce laboratoire m'a également permis de découvrir comment générer une clé SSH, la configurer sur GitHub et cloner un dépôt distant sur mon ordinateur. La création et l'organisation des différents dossiers m'ont aussi aidée à comprendre l'importance d'une bonne structure dans un projet informatique.

Malgré quelques difficultés rencontrées durant certaines étapes, ce travail a été une expérience enrichissante qui m'a permis de développer mes compétences pratiques et mon autonomie. En tant qu'étudiante en informatique, je considère que ces connaissances me seront utiles pour réaliser mes futurs projets, travailler en équipe et progresser dans mon parcours universitaire.
